

Here is a letter that you can print. You can do with this letter what I did at an automotive trade show. You can do your best to get this in the hands of the decision makers that decide where products will be produced. It does not have to be the automotive industry. It could be any industry that creates goods. Put your name on it if you wish or leave my name on it. You will be most effective by sending it to American companies where you see evidence that they are producing goods overseas. The other thing that you can do is be inspired by this letter. The next time you spend money, read the label. If you have a choice to buy an American made product over a foreign made product and choose to do so, you are affecting demand and demand is what drives our marketplace.

Please pass this on to the higher ups in your company.

Your company is part of the manufacturing sector that has made this country great. Since the market crash in 2008 this country has lost over a million manufacturing jobs. So, now here we are 3 years later. Think of the negative effects we have experienced!

Our homes have lost value....Our utility bills have gone up.....

Our trade deficit has gone up.....Our national debt has gone up.....

Social security and other government-supported programs are hurting.....

And we scratch our heads and wonder what are we going to do about this situation?

We all agree that more jobs here at home are what we need. Who will lead our recovery?

How bout you? Are you influential enough to lead and be a part of a recovery?

Here is my idea..... Why don't you consider bringing some of our jobs home? Pick a city and lift it up with jobs!!!! There are plenty of Americans out there that would be proud to work for you. All you need to do is provide the opportunity and results will follow.

Think of how famous you will be when Diane Sawyer brings world news to your factory to show America how we are coming back!!!! Your friends will envy you!!!!

The two worst problems we face today are a rising national debt and a rising trade deficit and jobs are what we need to fix both.

Please help. And thank you for what you are already doing.

Norm Maran. Doing my part for my kids.

Make your home worth more!!!!!

Create Jobs Here in the USA!!!!!
